Specification

1. The abstract of the disclosure is objected to because the abstract is more than 1 paragraph long. Correction is required. See MPEP § 608.01(b). The abstract should be in one paragraph and no more than 150 words.

Claim Objections

2. Claims 1-3 are objected to because of the following informalities: The claims use "&" to denote the word "and". The word "and" should be written out in its entirety. Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
4. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
5. The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.
6. Claims 1-3 are rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim(s) must be in one sentence form only. Note the format of the claims in the patent(s) cited.

At the time of this Office Action, the claims are indefinite to such a point that no prior art can be applied to the claims, since it is unclear what the Applicant is trying to claim.
